Summary

Computer Science undergraduate with strong foundations in Data Structures, Algorithms, and full-stack web development. Experienced in building AI-powered and scalable applications using React, Node.js, TypeScript, and AWS through hackathons and personal projects. Passionate about solving real-world problems and continuously improving software engineering and problem-solving skills.

Education

Chaitanya Bharathi Institute of Technology (CBIT) <i>Bachelor of Engineering in Computer Science and Engineering</i>	2024 – 2028 CGPA: 9.55 / 10
FIITJEE Junior College — Hyderabad <i>Intermediate (MPC)</i>	2022 – 2024 Percentage: 96.4%

Projects

ContentIQ – AI Media Creation & Distribution Platform <i>React, TypeScript, AWS</i> – Developed during AI for Bharat Hackathon. – GitHub Live Demo – Engineered an AI-powered platform that analyzes video and audio content to produce scene-level insights, scripts, and engagement predictions. – Integrated multimodal media analysis and automated content optimization using AWS services including S3, Lambda, Bedrock, and Transcribe. – Implemented capabilities such as video intelligence, script generation, multilingual dubbing, background music recommendation, and automated social media distribution.	Mar 2026
Arogya Sarathi – Rural Healthcare Communication Platform <i>React, Node.js, Express</i> – Hackathon Project – Healthcare Accessibility Solution. – GitHub – Created a low-bandwidth healthcare web platform enabling rural patients to share symptoms, images, and voice notes with doctors asynchronously. – Designed an offline-first architecture using browser local storage, client-side compression, and Base64 encoding to support unstable network environments. – Implemented a full-stack system using React (TypeScript), Node.js, and Express.js to enable reliable medical communication in remote regions.	Jan 2026

Technical Skills

Programming Languages: C, C++, Python, Java, JavaScript

Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (DBMS)

Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js

Python Libraries: NumPy, Pandas, Matplotlib

Databases: MySQL, Oracle Database 21c, MongoDB

Developer Tools: Git, GitHub, Visual Studio Code

Problem Solving: Solved 200+ problems on LeetCode

Certifications & Hackathons

- **Data Science Foundation Certification — Infosys Springboard (Feb 2026)** Certificate
- **Dev Duel Hackathon — Ranked 36th, Elan & nVision Technical Festival, IIT Hyderabad (2026)** Certificate
- **Adobe India Hackathon — Participated in MCQ Assessment + Coding Round (Team: Binary Brains)** Certificate
- **AI for Bharat Hackathon — Participant (2026)**
